

## **Superintendent of Water/Wastewater Systems**

The City of Gloucester, Camden County, is seeking an individual to direct operations and maintenance of the City's Utility Department, which shall include a full time titled position as a Water and Wastewater Treatment Superintendent. The City is seeking a qualified professional to oversee all aspects of the Water Treatment and Distribution System, Combined Waste Water collection system, Combined System Overflows (CSO) and Storm Water Management operations. Must also be able to maintain recreational waters.

The City has a population of 11,400 and provides water to the entire City through a modern water treatment facility and maintains 4 separate wells, and services 4,560 accounts. The City is also responsible for the collection of wastewater through a combined sewer system and operates 7 CSOs. A portion of the City is supported by a separate wastewater system under the MS4 permitting requirements.

Successful applicant will be responsible for planning, scheduling, directing, controlling, and coordinating daily and long term operations, including the utilization of manpower, equipment, materials, funds, and other available resources. Must possess, or be willing to obtain the following: Water: NJDEP T-4, W-2; Sewer: C-4; Storm Water: MS4 Tier A. Knowledge and experience with SCADA systems and utility billing is preferred.

Depending upon responses and the level of licenses available, the City may, at its discretion, opt to separate some of the necessary requirements among one or more separate positions.

Municipal government experience in a union environment preferred, but not required. Must be able to pass a pre-employment physical and drug screening, and must possess a valid NJ Driver's License. Salary is negotiable and may depend on qualifications and certifications held.

Please send resume and salary requirement by mail, no later than December 5, 2016 to:
